**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding to claims 1 and 13, the prior arts in the record fail to disclose or make obvious to an adaptive service interworking comprising interpreting the connection information to determine whether the end-point network switch is capable of supporting a transparent link between the sending party and the receiving party within the structure of the claims.

Regarding to claims 9 and 13, the prior arts in the record fail to disclose or make obvious to an adaptive service interworking comprising interpreting the setup message to determine whether a transparent link is to be established between a sending party and the receiving party, wherein the transparent link does not transform a data transport protocol to a network data transport protocol within a structure of the claims.

Regarding to claims 11 and 20, the prior arts in the record fail to disclose or make obvious to an adaptive service interworking comprising interpreting the Setup message to determine whether a transparent-links is to be established between a sending party and the receiving party; and when the transparent link is to be established, supporting the transparent link, appending a receiving enhanced traffic descriptor to a connection message to produce a modified connection message, and transporting the modified connection message to a beginning end network switch operably coupled to the sending party within a structure of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
